EDUCATION

CHRIST DEEMED TO BE UNIVERSITY DELHI NCR

Bachelors in Computer Application

2023 - 2026

VVDAV PUBLIC SCHOOL, VIKAS PURI, NEW DELHI

Commerce with IT CLASS-12th

2022 - 2023

EXPERIENCE

Full Stack Developer Intern

Publicis Re:Sources | Remote

Jan 2026 – April 2026

- Developed and delivered multiple full-stack web assignments using HTML, CSS, JavaScript, React, AngularJS, and Express.js, covering both front-end UI and back-end API tasks.
- Built responsive, component-based interfaces with React and AngularJS, applying best practices in state management, routing, and reusable component design.

Python Intern

Vrinda Solutions | Remote

May 2025 – Jul 2025

- Selected for a remote internship as a Python developer, contributing to backend logic and data automation tasks.
- Assisted in developing Python scripts for data processing, automation, and integration with APIs.

Web Development Intern

Ecarter Technologies Pvt. Ltd. | Noida, India

Jun 2024 – Jul 2024

- Completed a 1-month full-stack web development internship using HTML, CSS, JavaScript, and SQL.
- Gained exposure to building responsive and interactive web pages aligned with modern UI/UX standards.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS

Frontend and Backend: React.js, Tailwind CSS, Node.js and Express.js

Databases: MySQL, MongoDB (ATLAS), Firebase

Tools & Frameworks: Git, GitHub, VS Code, OpenCV, Flask, Rest APIs, JWT

PROJECTS

BiteTrack | MERN-Stack Food Expense & Analytics Platform

MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT, OAuth

- Built a full-stack food expense tracking platform with secure JWT authentication, Google/GitHub OAuth login, and personalized order history management using the MERN stack.
- Developed an interactive analytics dashboard featuring spending insights, monthly budget tracking, restaurant trends, meal-type analysis, filtering/search, and dynamic charts for real-time expense visualization.
- Engineered persistent cloud-based budget and order management with MongoDB integration.

Car Price Predictor | AI-Powered Web App

Python, Flask, scikit-learn, Pandas, HTML, CSS, JavaScript

- Built an AI-driven pricing engine using Random Forest and Gradient Boosting models with feature engineering (brand, age, mileage, fuel type) to deliver instant, high-accuracy resale for 2025 Indian market conditions.
- Developed a responsive Flask web interface with cyberpunk-inspired UI, interactive tooltips.
- Integrated India-specific insights—depreciation analysis, scrappage-rule alerts and confidence scoring.

CERTIFICATES

- Introduction to Front End Development (Meta)
- Data Analysis with Python (Cognitive Classes)
- Gen AI Agents: Transform Your Organisation (Google Cloud)
- AWS Academy Graduate Cloud Foundation (Amazon AWS)
- Python For Data Science and AI (IBM)
